MEDICATION ADMINISTERING POLICY

The Kinney Center and Saint Joseph’s University staff cannot be responsible for providing medication. In the case that medication must be provided during Kinney Center program hours, the parent/guardian must make arrangements to distribute the necessary medication at the appropriate time. If your child requires medication, please contact the Kinney Center at kinneyautism@sju.edu or 610-660-2170 to make these arrangements. In the event of emergencies, staff may provide medications or medical devices where warranted. Medications and devices that may be used during emergencies can include inhalers, epi-pens, and seizure medications. These items will only be provided when accompanied with a doctor's note approving their use in emergency situations. If your child requires any of these medications or devices for emergency situations, please be sure to provide a current doctor's note and the medication and/or device on or prior to the first day of a Kinney Center program.
